

Pramodya Priyasanka

📞 0759455367 📍 Homagama, Sri Lanka ✉ priyasankapramodya@gmail.com  [LinkedIn](#)  [Github](#)

Motivated and detail-oriented BSc (Hons) Data Science graduate with strong hands-on academic, internship, and project-based experience in data engineering. Experienced in building ETL pipelines, data validation workflows, and scalable data processing systems across airline operations, AI platforms, and event analytics. Proficient in Python and SQL with a solid foundation in data modeling, automation, and cloud-based data workflows. Passionate about transforming raw data into reliable, production-ready datasets to support analytics and machine learning use cases.

EDUCATION

BSc (Hons) in Data Science -Sri Lanka Technological Campus University (2021–2025)

GCE Advanced Level Examination (2018-2020)
B/ Diyathalwa Central College

TECHNICAL SKILLS

Language: Python, SQL, Java, JavaScript

Machine Learning: Model Training, RAG, LLMs TensorFlow

AI Automation: n8n, REST API integrations, AI Agents ,OpenAI API

Computer Vision: Roboflow, Image Annotation, Detection Models

Development &Framework: GitHub, Copilot, React,Node.js

MLOps Deployment :FastAPI, Docker, API based Inference,MLflow

Cloud Platforms: AWS ,Vercel , Firebase

WORK EXPERIENCE

Ai Engineer -Astakon Labs November 2025-Prsentsent

- Contributed to the NextHire project using Wortex Text AI and Cloudscape React.
- Developed serverless cloud functions for automating CV screening, AI-driven interviews, and HR scheduling.
- Designed backend workflows that improved processing efficiency and reduced manual intervention.
- Collaborated with senior engineers to optimize data flow and enhance system scalability.

Associate Data Analyst – Inpaly Matrix April 2025 – October 2025

- Monitored and analyzed virtual event performance data to ensure accuracy and consistency.
- Detected and resolved real-time technical issues impacting data integrity.
- Applied Python-based analytics for trend detection and event optimization.
- Supported cross-departmental reporting by transforming raw event data into actionable insights.

Information Technology Business Analyst (Data & Power BI Focused) – Flight Operations Sri Lankan Airlines – Aug 2024 – February 2025

- Analyzed flight data using Power BI for audits, risk analysis, and performance reporting.
- Automated report generation through Power Apps and Power Automate, improving reporting efficiency.
- Utilized SQL and Python for ETL processes, data cleaning, and validation tasks.
- Collaborated with cross-functional teams to resolve data issues and enhance analytics workflows.
- Built and maintained CI/CD data pipelines to ensure accurate and timely operational reporting

CERTIFICATION

- Python for Data Engineering: From Beginner to Advanced - LinkedIn (2024)
- Prepare for the Azure Data Fundamentals (DP-900) Certification Exam - LinkedIn (2024)
- Microsoft Power BI Data Analyst Professional Certificate - Coursera (2024)
- Artificial Intelligence and Machine Learning in Business - Alison (2023)
- Foundation in Project Management - Coursera (2023)
- Smart Analytics, Machine Learning, and AI on Google Cloud - Coursera (2024)
- Artificial Intelligence Foundations: Machine Learning - LinkedIn (2024)
- Generative AI with Diffusion Models - Amazon Web Services (AWS, 2024)

SOFT SKILLS

- Critical Thinking
 - Team Collaboration
 - Research and Development
- Adaptability
 - Time Management
 - Creativity and Innovation
- Continuous Learning
 - Analytical Thinking
 - Leadership

PROJECTS

AI Interview Platform

Built a real time interview simulator with interactive coding and feedback. Implemented RAG pipelines for CV based questioning and advanced prompt engineering for adaptive personas. Leveraged AI assisted coding tools to reduce development time by 40%, enabling rapid prototyping
Technologies used: Python (FastAPI), React.js, Tailwind CSS, MongoDB, OpenAI API, NLP, WebSocket, Docker, AWS/GCP,RAG

AI Content Automation Agent

Designed an AI agent that automates marketing content generation and distribution using OpenAI APIs and prompt engineering, integrating CMS publishing and Slack notifications through scalable automation workflows.
Technologies: Python, OpenAI API, n8n, FastAPI, React.js, MongoDB, REST APIs, Prompt Engineering, Automation Pipelines, Docker

AI driven Customer Segmentation

Personalized Marketing automates customer segmentation in e-commerce using scikit-learn, PyCaret, and PyTorch Lightning. It leverages SHAP for explainable AI, OpenAI API for insights, and Tableau and Plotly for interactive data visualization. The system continuously refines customer segments through real-time data updates and validation techniques, enhancing personalized marketing strategies.
Technologies: Machine Learning, Scikit-learn, PyCaret, PyTorch Lightning, SHAP, OpenAI API, powerbi, Matplotlib, Pandas, Python, Data Preprocessing, Analysis, and Visualization

Generative Design Tool for architecture and urban planning

The Generative Design Tool for Architecture and Urban Planning leverages the MERN stack, Three.js, and AI technologies like TensorFlow to automate the creation of diverse architectural designs based on selected land areas and real-time geospatial data. The tool enhances design flexibility and efficiency, empowering architects and urban planners with innovative and sustainable design solutions.
Web Development · MERN Stack (MongoDB, Express.js, React, Node.js) · Three.js, Material-UI , Mapbox API Google Maps API, TensorFlow, Genetic Algorithms, Data Visualization

EXTRA-CURRICULAR ACTIVITIES

- IEEE Computer Society SLTC Research University
- OC member of project Codemania V3.0 (overseeing the planning and execution of a hackathon and workshop, fostering innovation and collaboration in software development-2023)
 - Participated in Codemania V3.0 and V4.0 (Python) (Hackathon)-(2024)
 - Participated in Codemania V5.0 (Python) (Hackathon)-(2025)
- LEO club University of SLTC Research University
- Board member - Design team head -(2022-2023)
 - Member -(2021-2024)
